## CPP 0107 – ANTI-STATIC PANEL DEGREASER

### DESCRIPTION

ANTI - STATIC PANEL DEGREASER is a specially formulated blend of alcohol and aliphatic solvents with a static dissipaters additive incorporated.

It has much greater conductivity than normal precleaning solutions and can therefore dissipate static electricity. This minimizes the disorientating effect of static on the metal particles in the paint film helping to give a more even metallic appearance when the paint has been applied to the vehicle.

The product is designed so that it retains all the advantages of normal precleaning solutions. It helps to eliminate other problems in the refinishing process, such as poor adhesion, slow drying and cissing, which are caused by poor degreasing and cleaning.

ANTI - STATIC WIPE SOLVENT has been formulated to quickly remove grease, oils, waxes and other contaminants without softening old paintwork.

### APPLICATION

Always degrease before and after sanding or flatting operations. Panels must be dry before degreasing. Apply ANTI - STATIC WIPE SOLVENT freely with clean cloths, changing cloths often to prevent transfer of contamination from one area to another. Wipe dry with a clean cloth.

WARNING - Certain paper cloths are dissolved by solvents. Check before use.

### FLASH POINT

Below 22`C

### STORAGE

Correctly stored material, in firmly closed original containers, has a shelf-life of over 1 year. Contents of opened containers should be used up quickly. Always replace cap immediately after use.
